

YOUR WORLD MADE SIMPLE

Have you ever wondered if it was possible to control the lights, music, security system, even temperature – from across the room? Or how about from across the globe?

It all begins with a simple touch...

Meet g! A family of products designed to provide more convenience, comfort and peace-of-mind than you ever thought possible. Personalized to fit your specific lifestyle, these solutions range from simple family room control to full whole-home entertainment and management – even remote monitoring of vacation homes.

And best of all, with g! – whether you're moving around the room or around the globe, the system is just as easy to use. Thanks to its uniform look and feel, no matter what g! interface you touch, it will simply feel like home.

Living with *g!*

Now that g! has cataloged our entire collection of music and movies it's easier than ever to find our favorites. Instead of thumbing through stacks of discs, we simply use our remote to flick through cover art on the TV.

loving music & movies

going green in style

We try to do our part in protecting the environment, so we love that g! gives us the ability to set automatic schedules for lighting, climate and irrigation. Conservation without frustration – that's an idea we can warm up to.

using it everyday

Using our phones we can confirm that our son made it home from school safely – and is doing his homework. And when we're together at the end of the day, g! makes it easy for us to set the mood for movie night, or retire for the evening listening to different music in every room.

controlling from anywhere

Even though I logged 250,000 miles in the air last year, with g! my home is always within reach. Using my iPhone I can check the temperature, control the lights, open the garage door to receive a delivery, even get up-to-the-minute alerts from my home.

HOME

Think of the things you do to get ready in the morning: turn on the lights, check the weather and traffic reports, maybe even turn on the morning news. g! delivers your world at a glance with a personalized dashboard for your home. Customize your screen with the things you use most such as weather forecasts, camera video, lighting, even security system features. With g! it's all about you.

“It's amazing how one elegant screen has simplified our life at home, giving us immediate access to what we care about most. And when we go on vacation, a single button press puts our home in 'green' mode.”

...your home at a glance.

Control the lights

MEDIA

What if you could press a button to access your entire collection of music and movies – *from anywhere in your home?* g! catalogs your discs and displays them with brilliant cover art right on your TV, touchscreen, or iPhone, making it easier than ever to find your favorites. If you're really into music, you'll love finding new favorites with Pandora®, Rhapsody™ and SHOUTcast streaming services.

“Now that we have easy access to our music from any room, we have rediscovered our favorites. And the sound quality is just incredible!”

...it's a whole new music and movie experience.

One touch control of your home theater

Access your entire collection of music and movies

Brilliant cover art and alphabetical list views

Rhapsody, Pandora and SHOUTcast internet music

Control music in other rooms

Easily create playlists of your favorites

SECURITY

Does your current security system ramp up the lights when the alarm sounds? Does it flash the exterior lights to alert the neighbors? g! adds this intelligence to better protect your investment and your family. Plus, it can send text message alerts to your cell phone and allows you to remotely arm or disarm the system.

“If there is an emergency, g! gives us quick access from every room in the house – or anywhere in the world. Now we can rest easy knowing that our family is safe and secure.”

Replaces unsightly security keypads

Instantly see if doors or windows are open

Full event history

Arm or disarm the system remotely

Mobile phone alerts

...peace of mind at home or away.

CLIMATE

Studies have shown that lowering a thermostat just three degrees can save up to 10% on your energy bill. With g! not only can you automate these adjustments, but you also gain access to detailed history views that allow you to monitor the system and make informed decisions about consumption. And if you own a vacation home, you'll love the remote access that gives you control while away.

“Being green has never been easier. With one button press I can set the entire system to ‘away’ mode. If I leave work early, I can remotely adjust the temperature so the house is comfortable when I arrive.”

...changing the temperature was never so cool.

Adjust the temperature in one room or many

Change settings while on-the-go

Save energy with scheduling

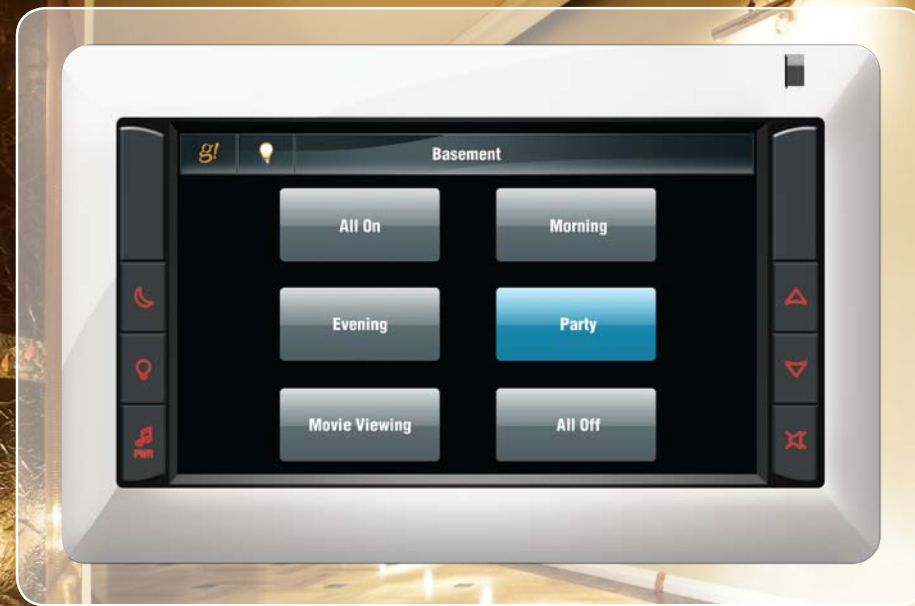

Monitor usage with history view

Perfect for vacation homes

LIGHTING

If part of your bedtime ritual involves going from room to room checking the lights, there is a better way. With g! a simple touch can quickly turn them all off, or set the perfect party mood for the entire home. Save energy by dimming lights and creating custom schedules for landscape lighting. Plus remote access features will ensure you always arrive to a well-lighted home.

“Not only is my lighting system beautiful, with g! it’s also easy to use. When I’m entertaining guests, I just press one button to light my entire home.”

Change brightness of several lights with a single press

Customizable scenes to set the perfect mood

Save energy with automatic scheduling

Control lights back home while you're away

Works seamlessly with ELAN lighting products

...bright ideas for the way you live.

IRRIGATION

The dials and switches used by many irrigation systems can be confusing and difficult to use. g! takes the guesswork out of watering your lawn and puts you in control with a simple, easy-to-read display. Conserve water by detecting rainfall and setting up personalized schedules, or give landscapers limited remote access to monitor the system and make adjustments.

“I get to spend more time enjoying my lawn, and less time playing weatherman – and I use less water than before! It’s like having autopilot for my backyard.”

...your neighbors will be green with envy.

Conserve water by detecting rainfall

Automatically adjust for the changing seasons

Remote access for landscaping services

MESSAGING

While g! can't drive your children to ballgames, it is your digital personal assistant allowing you to check your email and leave recorded messages for others. Each family member can easily create a custom greeting for their voicemail and be sent alerts or emails when new items arrive. And you can play messages directly from the touchscreen or remotely using a PC or phone.

“My son loves leaving me handwritten notes on the screen. And since our family is always on the go, having separate mailboxes for our messages keeps us organized. Say goodbye to sticky notes!”

...a master in communications.

Integrated voicemail, caller ID & call history

Custom mailboxes and greetings

Outgoing alerts via phone, text message, or email

Leave a handwritten message

VIDEO

If a picture is worth a thousand words, then video must be priceless. Whether you're checking on a vacation home, wanting to keep your family safe, or simply wondering who is at the front door – nothing gives you peace of mind like seeing them at your fingertips. And best of all you can view the same live video from your home, office, iPhone or anywhere in the world.

“I travel frequently, so getting a glimpse of home from the road is very comforting. I just open up my laptop to quickly see live video of my house – from anywhere in the world.”

View who's at the front door

Monitor the baby's room

Perfect for vacation homes

...keep an eye on what's important to you.

POOL / SPA

Wouldn't it be cool if you could turn on the spa from the bedroom as you don your swimsuit? Conserve energy with scheduling of pumps, water features and lighting, and harvest the sun's rays using automated solar covers. Also monitor pool health, receive customized alerts and even control the system from your cell phone. Time may not float on by, but with g! you can.

“In addition to all the pool automation features, we really love the way the landscape lighting is tied into a single, easy-to-use system. No more going into the house soaking wet just to turn on the patio lights.”

...take control of your backyard paradise.

Manage pumps, heaters, covers and water features

Control both pool and landscaping lights

Monitor pool “health”

Custom scheduling to fit your lifestyle

Conserve energy by automatically controlling solar covers

PHOTOS

In this new digital world, too often photos stay trapped in a PC or camera. Unlock those memories by turning every touchscreen and TV into a digital picture frame. Nothing gets the family together for “movie night” like a larger-than-life slideshow of your last vacation on the big screen.

“We love getting together and watching slideshows of our friends and family. Every time we do, it’s another step down memory lane that brings us closer together.”

...all of your memories at your fingertips.
