

The **Super-Vision™** Management System is a cost-effective management tool a business cannot afford to be without.

A four camera, high resolution colour system with computer and monitor, installed – complete with training can be purchased for approximately \$4500* or leased for approximately \$150/month.*

Would you give your manager a .20¢/hour raise if they could be everywhere all of the time?

**amount may be considerably less if using existing cameras*

THE
Management Tool

SUPER VISION™ IS YOUR 24-HOUR ON-SITE INVISIBLE MANAGER

The **Super-Vision™** Management System is a pc based monitoring system that captures digital video images. The **Super-Vision™** Management System allows remote access to your business from anywhere in the world. The **Super-Vision™** Management System will record onto a pc internal hard drive. This provides unlimited storage capabilities and unique quick search functions. It exceeds the capabilities of old analog switchers, multiplexers and time lapse VCRs for a fraction of the cost. The **Super-Vision™** Management System will allow you to view live or recorded images. All this can be achieved from anywhere in the world with **Super-Vision's** user friendly software.

What can Super-Vision™ do for you?

- Supervises employee efficiency and productivity
- Supervises training for efficiency, speed and quality of service
- Supervises inventory controls
- Supervises cash register activity
- Supervises loss prevention systems

Benefits of a reliable Super-Vision™ Management System

- Eliminate the necessity to replace worn out tapes
- Eliminate the high cost of cleaning, maintenance and service repairs
- Keep permanent records on disk
- Superior clarity of image over analogue
- Preferred system by law enforcement agencies to view any criminal activity

Instant & Advanced Search Capabilities

- Search or record by timed events
- Saves hours compared to viewing VCR tapes
- Record/Search by activity
- Only record or view when there is motion in an area
- Search/View by remote access
